

Network HD Media Player

Network HD Media Player

Model 7112

Our Network HD Media Player with Live Input is our top of the line media player. Capable of displaying live broadcasts from a Cable or Satellite feed via Component, S-Video, or Composite input with a user-definable layout and background. Use this player to brand a Live TV broadcast and display your featured products or promotions.

In addition this Player can automatically download content updates via a network connection according to a predefined playlist through a network connection or via a USB thumb drive. It is an excellent solution for large or small organizations looking for a flexible Digital Signage Solution.

With Live Input!
